

TECHNICAL SPECIFICATIONS AND DATA

MEMBRANE

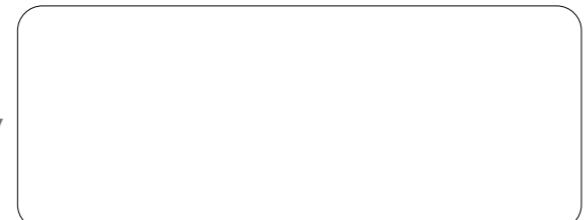

Material	Versatile®-PES Polyethersulfone (PES) + Polyvinylpyrrolidone (PVP)
Filtration area (m ²)	1.0 and 2.0
Inner diameter (μm)	210 ± 10
Outer diameter (μm)	290 ± 20
Wall thickness (μm)	40 ± 5
Max TMP (mmHg)	500
HOUSING	
Internal diameter (mm) :	32 (1.0 m ²) and 44 (2.0 m ²)
Potting material:	Polyurethane (PU)
Cartridge and blood port material:	Polycarbonate (PC)
Total filter length (mm) :	290
STERILISATION	Beta Rays

Technical features are subject to change without prior notice

FRACTIO smart™

Versatile®-PES S M L FRACTIONATORS

CASCADE FILTRATION ADVANTAGES

- Wide range of application
- Minimal Loss of non-pathogenic substances like albumin
- Selective apheresis of plasma components based on molecular weight

Versatile®-PES S M L is the

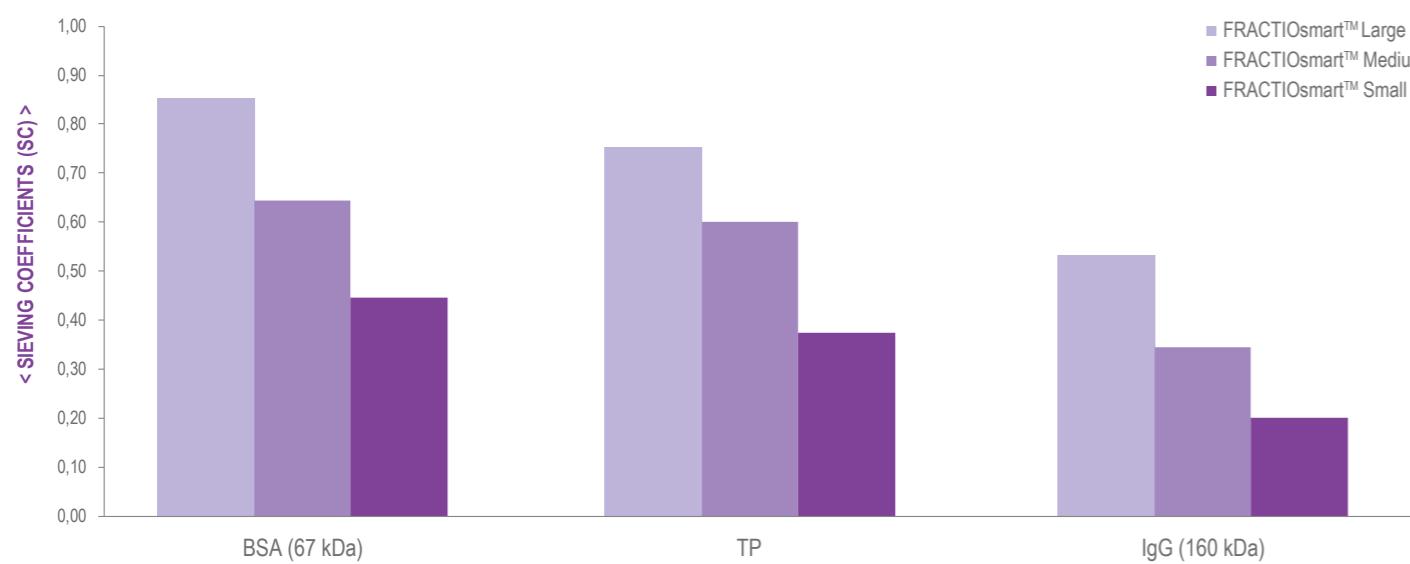

MEDICA hollow fiber membrane
specially developed for plasma fractionation
It is a registered trade mark of Medica S.p.A

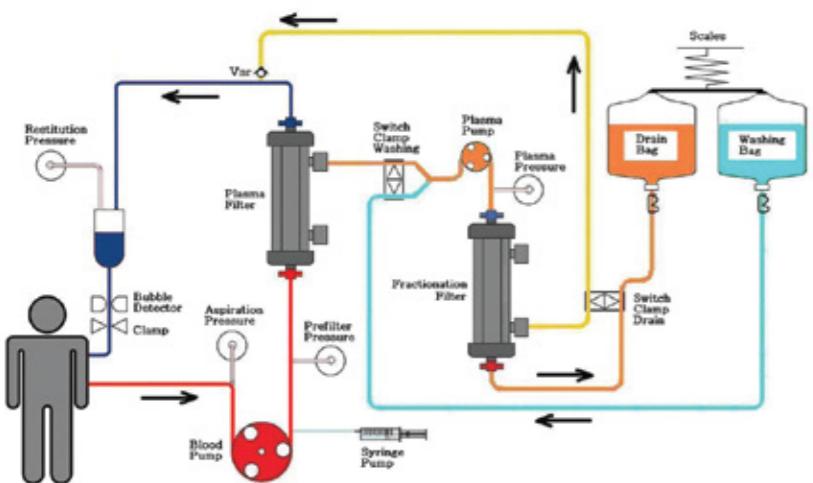

MEDICA
SEAMLESS INNOVATION FOR LIFE QUALITY

APPLICATIONS OF DOUBLE FILTRATION

FRACTIOsmart™ removes a high molecular weight components from plasma. Immunoglobulin, cryoglobulin, low-density-lipoprotein, viruses are involved in inflammatory, autoimmune diseases and similar forms with acute or chronic course. We recommend the use of **FRACTIOsmart™** with our **AFERsmart™** and **AFERsmartPlus™**

DOUBLE CASCADE FILTRATION

Cascade Filtration (CF) consists of a double filter system with the advantages of a selective removal without infusion of exogenous fluids. The separated plasma is pumped into a hollow fibers filter with a different nominal cut-off. The CF is effective in the cast nephropathy, in Waldenstrom's macroglobulinemia, in active cryoglobulinemia. CF is used successfully in Guillain-Barré Syndrome (GBS), Myasthenia Gravis (MG), hypercholesterolemia, Focal Segmental Glomerulosclerosis (FSGS) and recently in the Age-related Macular Degeneration (AMD), Lupus Erythematosus, rhabdomyolysis, acute renal failure due to Multiple Myeloma and others.

FRACTIOsmart™ Small

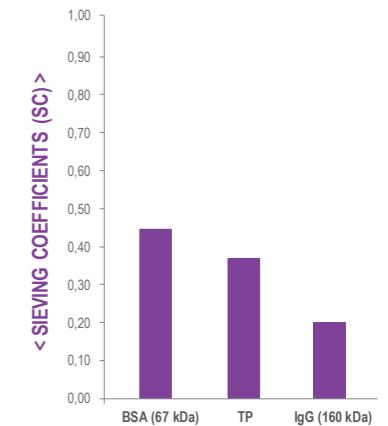

FRACTIOsmart™ Small is indicated for IgG Apheresis to treat immunological disorders.

Product Code

M90149
M90099

FRACTIOsmart™ Small 1.0
FRACTIOsmart™ Small 2.0

FRACTIOsmart™ Medium

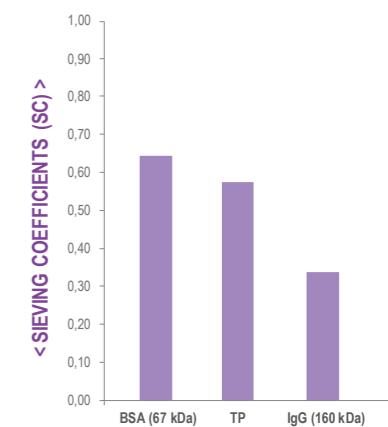

FRACTIOsmart™ Medium is indicated for immune complexes and IgM Apheresis.

Product Code

M90150
M90100

FRACTIOsmart™ Medium 1.0
FRACTIOsmart™ Medium 2.0

FRACTIOsmart™ Large

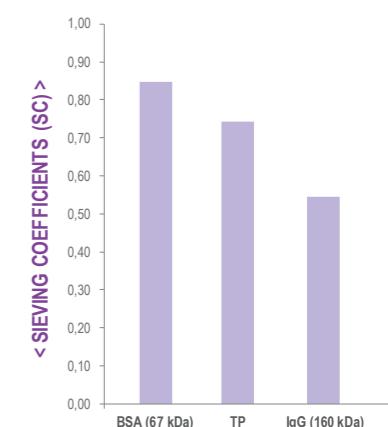

FRACTIOsmart™ Large is our proposal for LDL Apheresis, LDL apheresis is a form of apheresis, resembling dialysis, to eliminate the cholesterol-containing particle low-density lipoprotein (LDL) from the bloodstream.

It is used in diseases featuring high LDL, such as the rare homozygous familiar hypercholesterolemia, when the heterozygous form does not respond to medical treatment, or when the treatment has led to dangerous side-effects (such as rhabdomyolysis).

Product Code

M90151
M90101

FRACTIOsmart™ Large 1.0
FRACTIOsmart™ Large 2.0

INDICATIONS
